Understanding the Tax Cuts and Jobs Act of 2017

American Association of Port Authorities

Learn how census tract-based federal designations could mean opportunity, empowerment and real economic development and growth for your port. This informative conversation co-presented by Best Best & Krieger LLP Partner Ruben Duran, who is general counsel to the Port of Hueneme, will look in-depth at the new Opportunity Zones created under the authority of the Tax Cuts and Jobs Act of 2017, along with other, pre-existing federal programs aimed at spurring economic development and growth in the nation’s most-challenged cities and rural areas. Ports can and should be thinking about how to use these tools to leverage public-private partnerships for needed capital and other incentives for growth and advancement of jobs and economic benefits created by maritime industry, well beyond the borders of their port facilities.

When

Wednesday, April 18
10:45 a.m.
